Study Title: Airway MaNagement PrActices and Complications of InTubation in Indian ICUs (IMPACT): A prospective multicenter cohort study in Indian ICUs

I understand that a study "Airway MaNagement PrActices and Complications of InTubation in Indian ICUs (IMPACT): A prospective multicenter cohort study in Indian ICUs" conducted by "Dr. Atul Kulkarni, Professor and Head, Division of Critical Care, Dept. of Anaesthesia, Critical Care and Pain, Tata Memorial Hospital, Parel, Mumbai, Mobile no. 9869077526" involves recording of my relative's data related to insertion of a breathing tube in his/her wind pipe that has been collected from my relative's medical records.

I understand that my relative's condition requires insertion of a breathing tube in his/her wind pipe. Data will be collected related to nature of breathing difficulty, reasons for passing breathing tube, the techniques involved and the equipments used during the procedure. The level of training of doctors will be assessed and the complications if any till hospital discharge will be recorded.

I understand that there will not be any additional medical procedures over and above those which he/she would encounter during standard treatment.

I understand that this study has been approved by the Institutional Ethics Committee, Tata Memorial Centre and does not pose any additional risk to my relative beyond that which he/she would encounter while undergoing routine physical or psychological examinations or tests and/or which he/she would encounter in routine daily life activities. I further understand that confidentiality with regard to his/her medical data will be ensured, and that the results published will not in any way be linked to him/her. I understand that the Principal Investigator (Dr. Atul Kulkarni) would be willing to provide me with any additional information that I would want to know regarding the study.

I understand that if I decline to give consent for my relative's participation in this study or withdraw my consent at any stage of the study my relative's medical treatment will not be affected.

I understand that if I have any queries at any time about the study or the procedures, or if my relative experiences any adverse effect as a result of participating in this study, then I can contact,
